

Test of AkkuFresh® by EU distributor partner

The AkkuFresh®'s performance was successfully tested by our EU distributor in March 2005.

The distributor used the standard "[Test Instruction](#)" & "[Test Sheet](#)" provided by the manufacturer. This test was insisted on by the distributor, and it was carried out by the distributor's employee before the distributor had started the product sale. The successful test was the condition for the start of distribution.

Tests were carried out with a Toshiba Libretto notebook with the original battery used daily. The battery was a Lithium-Ion made in 2001. The specifications of installation stress that the film must cover at least 80% of the battery, and with this intention, they needed seven foils.

The distributor had started by writing down on the "Test Sheet" the original new condition of the battery in standby time. After the condition of the battery in standby time before the use of AkkuFresh® foil, and finally the condition of the battery in standby time after 10 cycles (power-down / recharge) with the use of AkkuFresh® foil.

The original new condition of the battery in standby time was 3 hours.

Before the use of AkkuFresh® foil, the condition of the battery in standby time was 10 minutes.

After the use of AkkuFresh® foil, the condition of the battery in standby time was 1.5 hours.

Result: 150% increase in standby time.

The test has clearly proved the effectiveness of the nano-tech battery life foil technology of AkkuFresh® Next Generation™!

The distributor stated the following after the test:

- The test result fully convinced the distributor about the function of AkkuFresh® Next Generation™.
- The distributor would recommend AkkuFresh® Next Generation™ to other retailers and wholesalers.
- The test result reinforces the previous information provided by the manufacturer
- The distributor wanted to become AkkuFresh® Next Generation™ retailer and/or wholesaler.

The effect and performance of AkkuFresh® Next Generation™ depend on several factors: Type of device (mobile phone/notebook/camera / etc.), brand, model, type of battery, age,

status (total amount of charging-discharging cycles), external temperature, environmental conditions, and cellular network.

AkkuFresh – Power Extender Independent Test

We tested the samples that we received from the AkkuFresh distributor with a Toshiba (h'helto) type lithium-ion, / lithium-polymer battery operated cellphone, laptop, PDA, digitalcamera, GPS, or Li-ion, it was Li-ion brand made on 2007 (battery year). I followed the distributor's instructions while performing the test.

The test was conducted over a period of 10 days / hours. When was a new battery it stand for 5 days / hours, prior to the test the battery stand for 0 days / hours. After 10 days / hours, the battery stand up time was 1.5 days / hours.

Our test results showed 150 % increase in battery life.

(please mark and fill in the appropriate information)

Our company found the following during the AkkuFresh test:

- ☐ The product didn't work.
- ☒ The test result fully convinced us about the function of the product.
- ☒ We would recommend AkkuFresh to other retailers, wholesalers.
- ☒ The test result reinforces the previous information afforded by the distributor.
- ☒ We would like to become an AkkuFresh retailer and/or wholesaler.
- ☒ We confirm, that Biokarma Ltd will advertise our company for free of charge, with this test result until we distribute the product.
