

Test of AkkuFresh® by Matsushita Electric Industrial Co., Ltd. (Panasonic, Technics, JVC)

[Panasonic Holdings Corporation](#), originally founded as Matsushita Electric Housewares Manufacturing Works and long known as Matsushita Electric Industrial Co., Ltd., is one of the world's largest and most historic electronics conglomerates. Headquartered in Kadoma, Osaka, Japan, the company officially changed its global corporate name to [Panasonic Corporation](#) on October 1, 2008, to unify its corporate identity with its globally recognized brand

Comparison of voltage change between lithium-ion batteries with and without AkkuFresh® (Tested in collaboration with Matsushita Electric Industrial Co., Ltd.).

The feature of lithium-ion battery for mobile phones is to keep going on with the same voltage for a certain time and to drop the power down suddenly and sharply when the charged electric power is used up.

The test result clearly indicates that the battery with AkkuFresh® Next Generation™ lasts much longer, as shown by the graph.

Upper graph line = battery without AkkuFresh® foil

Lower graph line = battery with AkkuFresh® foil

The test of Matsushita Electric Industrial Co., Ltd., has clearly proved the effectiveness of AkkuFresh® Next Generation™ - the original nano-tech battery life foil technology.

The effect and performance of AkkuFresh® Next Generation™ depend on several factors: Type of device (mobile phone/notebook/camera / etc.), brand, model, type of battery, age, status (total amount of charging-discharging cycles), external temperature, environmental conditions, and cellular network
