

Test by Vodafone franchise partner AkkuFresh® in 2007.

The AkkuFresh®'s performance was successfully tested by an EU distributor (Vodafone's franchise partner) in February 2007. [Vodafone Group](#) is a leading global technology communications company providing mobile, fixed-line, broadband, and TV services across Europe and Africa.

The distributor used the standard "[Test Instruction](#)" & "[Test Sheet](#)" provided by the manufacturer. The distributor insisted on this test, and the distributor's employee carried it out before the distributor had started the product sale. The successful test was the condition for the start of distribution.

Tests were carried out on a Samsung cell phone with the original battery used daily. The battery was Lithium-Ion. The specifications of installation stress that the film must cover at least 80% of the battery, and with this intention, they needed one foil.

The distributor began by recording the battery's original standby time on the "Test Sheet," followed by its standby time before applying the AkkuFresh® foil and after 10 power-down/recharge cycles using the foil.

The original new condition of the battery in standby time was 250 hours

Before the use of AkkuFresh® foil, the condition of the battery in standby time was 47 hours

After the use of AkkuFresh® foil, the condition of the battery in standby time was 142 hours

Result: 302% increase in standby time.

The test has clearly proved the effectiveness of the nano-tech battery life foil technology of AkkuFresh® Next Generation™!

The distributor stated the following after the test:

- The test result fully convinced the distributor about the function of AkkuFresh® Next Generation™
- The distributor would recommend AkkuFresh® Next Generation™ to other retailers and wholesalers
- The test result reinforces the previous information provided by the manufacturer
- The distributor wanted to become AkkuFresh® Next Generation™ retailer and/or wholesaler

FIND US ON

The effect and performance of AkkuFresh® Next Generation™ depend on several factors: Type of device (mobile phone/notebook/camera / etc.), brand, model, type of battery, age, status (total amount of charging-discharging cycles), external temperature, environmental conditions, and cellular network.

AKKUFRESH - Power Extender

We tested the samples that we received with a SAM. 317 type of lithium-ion, / lithium-polymer battery operated cellphone, laptop, PDA, digitalcamera, GPS, or _____, it was _____ brand made on 2007.03 (battery year).

- We followed the distributor's instructions while performing the test.
- The original performance of the device (standby time): 150 Day/Hour
- In the first part of the test (without AkkuFresh) we fully charged the device.
- Date of the first charging (without AkkuFresh) : Date: 2007.05.15 Hour: 19:00
- The date when the battery became flat (without recharging): Date: 2007.05.17 Hour: 20:00
- We covered at least 80% of the battery with AkkuFresh - Power Extender.
- We applied the AkkuFresh on: Date: 2007.05.18 Hour: 12:30
- We followed the instruction of the manufacturer on charging the battery with the applied AkkuFresh - Power Extender.
- The last changeup (after the 10th circle) Date: 2007.05.18 Hour: 17:00
- The date when the battery became flat Date: 2007.05.24 Hour: 19:00

Our test results showed 286 % increase in battery life.

****Please mark and fill in the appropriate information.**

- ☐ The product didn't work.
- ☒ We would recommend AkkuFresh to other retailers, wholesalers.
- ☒ The test result fully convinced us about the function of the product.
- ☒ We would like to become an Akkufresh retailer and/or wholesaler.
- ☒ We confirm, that Biokarma Ltd will advertise our company for free of charge, with this test result until we distribute the product.
